

NEUROLOGY

EURO-NEURO – the collaboration between neurology and palliative care across Europe.

How do neurology and palliative care services collaborate across Europe? There is increasing interest in providing palliative care for people with progressive neurological disease but the full extent of the relationship is not known.

The EAN Palliative Care Specialty Panel and the EAPC Reference Group on palliative care and neurology are undertaking a survey of the collaboration between neurology and palliative care – entitled EURO-NEURO. All neurologists in the EAN and palliative care specialists in the EAPC and its constituent national associations are invited to take part.

What do we ask from you:

We would like you to provide information on areas of your work, the members of the team, the presence / absence of collaboration, attitudes to palliative care and neurology, and to future developments. There will also be free text areas where you may provide further information. The information will be anonymous. We would be very grateful if you could take the time to complete the following short online survey:

<https://www.smartsurvey.co.uk/s/N1WAQ/>

The questionnaire will take a short time to complete (10-15 minutes), and it has been kept as easy as possible.

If you have any questions:

This study has been reviewed by the Tizard Centre Research Ethics Committee at the University of Kent. Your participation is of course voluntary. By starting the questionnaire you will be deemed to have given consent.

If you would like any further information about this study, please contact Professor David Oliver D.J.Oliver@kent.ac.uk

Thank you for your time and effort to complete this survey We aim to provide all participants with feedback of the results.

Professor David Oliver

Professor Marianne de Visser
